CREATIVE PHOTOSHOOT IDEAS YOU CAN TRY TODAY |

Fujifilm cameras already have these, and they can help you take outstanding photos without needing to edit your photos in any other program. If you don't have a Fujifilm camera, you can just experiment with the standard filters that your camera already has.

Aside from black and white filters, cameras usually have a lot of interesting effects that you can play with to make your images pop or look more saturated.

Some of the filters might seem a bit extreme, but I think that they're a great way to leave your comfort zone, discover new colour styles, and familiarise yourself with an unconventional way of taking photos.
